

Health Data Exploration

Linda Avey
We Are Curious, Inc.

What is the relationship between my diet and the quality of my sleep? How do my CNVs map to others? Is there a connection between foot injuries and hypoglycemia? Does eating chocolate make my skin break out? How come codeine sometimes knocks me out and sometimes sends me through the roof? Do papaya enzymes affect the reading ability of my autistic seven-year-old? Will losing five pounds really prevent me from snoring? Is the insulin effect of fruit different when it's seasonal? Does my sensitivity to warfarin correlate to other sensitivities? Do

bacterial infections correlate to other bacterial infections? Does a quarter mile to my daily run? What's protective? What's

We've got questions.

the relationship between laughter and immunity? Does chromium really help ward off Type 2 diabetes? Why do I have tinnitus? Does moist heat, magnets, massage, herbs, or relaxation improve my rheumatoid arthritis symptoms? Is chronic fatigue syndrome a mitochondrial disease? How can I leverage my genomic data to lose weight? What is the biochemical state corresponding to my best marathon race time?
